Rodrigo Stachlewski Palma

Senior Data & AI Engineer

email.rodrigopalma@gmail.com · linkedin.com/in/rodrigospalma · github.com/Rodrigo-Palma · Porto Alegre, Brazil — open to remote / relocation

Senior Data & AI Engineer who builds end-to-end systems — from data pipelines and warehouses to machine learning and modern GenAI (RAG, agents, LoRA fine-tuning) — and ships them to production with engineering rigor (CI, tests, evals). Azure Data Scientist (DP-100) & Microsoft Fabric (DP-600) certified; MSc in Big Data & BI.

SKILLS

AI / GenAI: LLMs, RAG, agents, LoRA fine-tuning, LLM evals, guardrails, vector DBs

Data Engineering: Spark, dbt, Airflow, DuckDB, Kafka, warehouses / lakehouses

Languages: Python, SQL, JavaScript / TypeScript

Machine Learning: PyTorch, scikit-learn, XGBoost, time series, NLP

MLOps / Cloud: Docker, Kubernetes, Terraform, MLflow, CI/CD, AWS, Azure

BI: Power BI, Microsoft Fabric

EXPERIENCE

Senior Data & AI Engineer — **Public Defender's Office of Rio Grande do Sul (DPE-RS)** 2024 – Present

- Modernized the data stack (resilience & reliability); built interactive dashboards powered by AI and NLP.
- Shipped production RAG with cited answers and local LLMs (guardrails + offline evals) for sensitive data.
- Cut ~R$200k/year (≈US$37k) in operating costs through pipeline optimization and resource right-sizing.
- Built ETL pipelines unlocking previously unavailable data and quantified staff productivity — informing a R$100M+ (≈US$18.5M) budget at an institution delivering 2.65M+ legal-aid services/year.
- Co-designed **CEC** (Comparador entre Congêneres), a BI system that fairly benchmarks workload across organizational units — **2nd place** at the national public-defender innovation congress (CNTI.Def / Enastic, 2026).

Judicial Technician — **Court of Justice of Rio Grande do Sul (TJRS)** 2017 – 2024

- 7 years inside the Brazilian justice system — deep public-sector / legal domain context.

Co-founder & Full-Stack Developer — **JogoMuitoOnline (Palma & Oliveira Ltda)** 2009 – 2014

- Built and ran an e-commerce business end to end: web development, cloud infrastructure and payments — ~5 years shipping full-stack software as a founder.

SELECTED PROJECTS

QuantLens — AI quant analyst for B3: local-first LLM + RAG + guardrails + measured evals. github.com/Rodrigo-Palma/quantlens

anchora — offline RAG over Brazilian public-law documents, cited & domain-grounded answers. github.com/Rodrigo-Palma/anchora

edgar-rag — RAG over SEC 10-K filings that cites its passage or declines; pre-registered eval on 300 unanswerable questions (a gate cuts answered ones from 13 to 3). github.com/Rodrigo-Palma/edgar-rag

market-elt — reproducible DuckDB + dbt ELT with data-quality tests. github.com/Rodrigo-Palma/market-elt

Upstream open source — more than 75 pull requests merged in 28 projects (great-tables, fsspec, tox, kedro, feast, Apache Iceberg, Delta Lake, pint, polars), bug fixes with regression tests. merged PRs

EDUCATION

MSc — Big Data & Business Intelligence, ENEB (European Business School of Barcelona) 2023–2025

BSc — Computer Engineering, Universidade Cruzeiro do Sul 2020–2024

MBA — Technology for Business: AI, Data Science & Big Data, Faculdade Única 2022–2023

Postgraduate — Artificial Intelligence, Faculdade Iguaçu 2023

CERTIFICATIONS

Microsoft Certified: Azure Data Scientist Associate (DP-100) · Fabric Analytics Engineer Associate (DP-600) · Power BI Data Analyst Associate (PL-300) · Certified Associate in Project Management (CAPM, PMI)
